

Getting Ready for Kindergarten

Starting kindergarten is an important step in the lives of children and their parents. Parents and providers need to take a close look at the child's development in many areas to help determine whether a child is ready to begin kindergarten whether the child may benefit from another year of preschool. This workshop will review some questions and activities to help prepare for the child and parent for kindergarten.

Please contact the Mid- State ECDC to schedule a workshop for your program or group.
