

## *Moving On: Transitioning families (From EI to CPSE or CPSE to CSE)*

*Making a transition easier occurs when families and providers understand the process. It is a time of excitement and anxiety. For families of children with special needs this transition can be even more challenging. This workshop will help participants to understand the transition process to be an active member of the transition team, understand the difference between EI and CPSE or CPSE and CSE, to understand the components of an IEP, and to strategize ways to introduce new providers to the child. Transition is a time of opportunity and growth, celebrate it!*

Please contact the Mid- State ECDC to schedule a workshop for your program or group.
